

Date	Topic	Where	Quantity	Notes
			Tomato	Variety: Baxter's Bush Cherry
5/28/2025	Direct Sow	Main Garden	1	Replaced one location of the red swiss chard on the street/wood fence side, where red swiss chard did not take. This for a fall garden harvest of cherry tomatoes
			Tomato	Variety: Roma
5/28/2025	Direct Sow	Main Garden	2	in middle of garden fence side over seeded by poorly performing bean plants 1 of the two, the other also garden fence side but at second overhead beam of garden enclosure, inclusive of the first beam on the chicken side. The second planting I believe replaced an underperforming tomato plant from spring planting.
			Tomato	Variety: Big Red
5/28/2025	Direct Sow	Main Garden	1	Replaced failing tomato at second run of garden support beam inclusive of beam closest to the coup.
			Tomato	Variety: Abe Lincoln
5/28/2025	Direct Sow	Main Garden	3	From the street / house side toward chicken coupe... at 2nd and 2nd and 1/2 run location planted in place of bad bean plants. then at the 3rd and 1/2 run to replace a tomato plant I killed trying to trellis
			Swiss Chard	Variety: Ruby Red
5/29/2025	Harvest	Wicking bucket	1	1 bunch of harvest (from two different harvest instances)
			Tomato	Variety: Baxter's Bush Cherry
5/30/2025	Amendments	Wicking bucket	3	added blood meal to the tomatoes in the wicking buckets as they do have fruit but their foilage is lighter green and less than in ground plants. Seeing if the added nitrogen will help
			Onion	Variety: Yellow store bought propogation
05/30/2025	Harvest	Main Garden	1	from last year propogation that was

moved from container to main garden
when main garden was completed, will
weigh later

			Tomato	Variety: Baxter's Bush Cherry
05/30/2025	Seed start	Garage	1	
			Tomato	Variety: Big Red
05/30/2025	Seed start	Garage	1	
			Tomato	Variety: Cherokee Purple
05/30/2025	Seed start	Garage	1	
			Rosemary	Variety: Rosemary
05/30/2025	Seed start	Garage	1	
			Fenugreek	Variety: Fenugreek
05/30/2025	Seed start	Garage	1	
			Chicory	Variety: Oasis
05/30/2025	Seed start	Garage	1	
			Tomato	Variety: Roma
06/02/2025	Harvest	Main Garden	2	1 roma tomato weighing 2 oz
			Tomato	Variety: Baxter's Bush Cherry
2025/06/06	Harvest	Main Garden	1	4.8 ounces 4 tom from bucket container and three from a main garden plant
			Tomato	Variety: Roma
2025/06/08	Harvest	Main Garden	1	two weighing total of 5.5oz
			Tomato	Variety: Roma
2025/06/08	Seed start	Garage	4	used egg carton pods with ~1/4 inch soil for planting and lightly covered. grow medium used was jiffy seed starting mix Started use of the seed heating pad and one day following we had germination.
			Onion	Variety: Yellow store bought propogation
2025/01/29	Transplant	Main Garden	7	Onion plants from store bought onions propagated in 2024
			Swiss Chard	Variety: Ruby Red

2025/01/29	Direct sow	Main Garden	2	Planted with propagated onion starts from store grocery onions. These did not survive where planted, I think they need to be planted when the temperatures are warmer. Since wicking bucket works may just recommend using those going forward and save the space.
2025/01/28	Seed start	Garage	4	Tomato Variety: San Marzano used egg carton pods with ~1/4 inch soil for planting and lightly covered. grow medium used was jiffy seed starting mix Started use of the seed heating pad and one day following we had germination. Transplanted to actual Garden 3/11/2025
2025/01/28	Seed start	Garage	2	Tomato Variety: Big Red used egg carton pods with ~1/4 inch soil for planting and lightly covered. grow medium used was jiffy seed starting mix Started use of the seed heating pad and one day following we had germination. Transplanted to actual Garden 3/11/2025
2025/02/04	Store transplant	Sidewalk garden	2	Tomato Variety: Big Red These where started from transplants at a depth to cover the plant pod. 120 day harvest is from seed so these will likely be ready in ~ 80 days
2025/02/02	Direct Sow	Raised Bed	6	Potato Variety: Unknown planted in raised bed made primarily of organic compost. These where store bought organic russets that had sprouted. Ended up with some blight I think and I clipped back leaves and then ended up

with only two plants surviving harvest
yield tbd

			Garlic	Variety: Unknown
2025/01/22	Direct sow	Raised bed	30	These are costco garlic that was soaked in hydrogen peroxide first. Next time I think I should also set in fridge for a week or so. Need to fill in if these are hardneck or softneck when identified. First 3 garlic plants surfaced on the 14th day as noted

			Onion	Variety: Yellow 1015
2025/02/05	Direct sow	Main Garden	69	Used a bamboo stick to set holes to drop onion starts in which saved my back and a lot of time, highly recommend repeating upon success :). The onions where paired with tomatoes as well as some being the only plants as dividers between larger plants to fully utilize spacing as noted in the 2025 Spring Garden planting map.

Many did not make it, believe they did not get enough watering & that more compost would have helped in mounding these.

			Tomato	Variety: Baxter's Bush Cherry
2025/02/07	Seed start	Garage	5	Started these out in the ~6oz planting plastic cups from the dollar general with about 1 inch seed starting mix (hydrated) compressed on bottom and 1/8 inch of seed starting mix (hydrated) placed on top. Transplanted to actual Garden 3/11/2025 acutal quantity unknown but theorized based on production visibility in june that we had two that went to main garden and three in container buckets Recommend starting seeds 1-2 weeks eariler in the garage.

			SunChoke	Variety: Jerusulum artichoke
--	--	--	----------	------------------------------

Garden Planner & Tracker by Jahascow: "All Plants" Log Entries

2025/03/03	Direct sow	Rectangular Plai	3	bought these tubers online at ebay and planted.
			Asparagus	Variety: unknown
2025/02/08	Store transplant	Raised bed	2	
			Marigold	Variety: Happy Days Mixed
2025/03/13	Seed start	Garage	6	intended to revamped front garden bed when ready, acclimated to outside on front porch starting around the 22nd of march planted in garden 29th of march
			Swiss Chard	Variety: Ruby Red
2025/04/01	Seed start	Wicking Bucket	1	Planted several in 1 wicking bucket
			Cilantro	Variety: Long Standing Santo
2025/04/02	Direct Sow	Wicking bucket	50	used potting mix made with vermiculite, pete moss, and homemade compost only
			Cilantro	Variety: Long Standing Santo
2025/05/20	Harvest	Front side garde	1	1 full bunch collected over three harvests, then the remainder of them died. Recommend not planting in this area due to low sunlight and the direct blast of air from the garage ac.
			Squash	Variety: Yellow Summer CrookNeck
2025/06/10	Harvest	Main Garden	1	3 oz yellow squash (from freebie squash plant)
