

Date	Topic	Where	Quantity	Notes
5/28/2025	Direct Sow	Main Garden	1	Replaced one location of the red swiss chard on the street/wood fence side, where red swiss chard did not take. This for a fall garden harvest of cherry tomatoes
5/28/2025	Direct Sow	Main Garden	2	in middle of garden fence side over seeded by poorly performing bean plants 1 of the two, the other also garden fence side but at second overhead beam of garden enclosure, inclusive of the first beam on the chicken side. The second planting I believe replaced an underperforming tomato plant from spring planting.
5/28/2025	Direct Sow	Main Garden	1	Replaced failing tomato at second run of garden support beam inclusive of beam closest to the coup.
5/28/2025	Direct Sow	Main Garden	3	From the street / house side toward chicken coupe... at 2nd and 2nd and 1/2 run location planted in place of bad bean plants. then at the 3rd and 1/2 run to replace a tomato plant I killed trying to trellis
5/29/2025	Harvest	Wicking bucket	1	1 bunch of harvest (from two different harvest instances)
5/30/2025	Amendments	Wicking bucket	3	added blood meal to the tomatoes in the wicking buckets as they do have fruit but their foilage is lighter green and less than in ground plants. Seeing if the added nitrogen will help
2025-05-30	Harvest	Main Garden	1	from last year propogation that was moved from container to main garden when main garden was completed, will weigh later
